

# ELECTRICAL INDUSTRY CERTIFICATIONS ASSOCIATION

## **Certification Card**

EICA is moving to Digital Certifications for cranes and digger derricks starting April 1<sup>st</sup>, 2020. We will allow employers and candidates to request a physical certification card for a charge of \$20 per individual.

We are pleased to announce that EICA will be working with SafetyWallet to send out digital EICA crane/digger derrick certifications. SafetyWallet is an online text-based certification database. Individuals can utilize SafetyWallet to store and track licenses or certifications; CDL, CPR card, OSHA 10/30 card, rigging card, crane certification card, etc.

Employees will be notified via text message of any certification that is expiring 1 year in advance and then again 90 days in advance.

Employees will have the ability to either email or text contractors their credential profile to provide evidence of certification.
